DETAILED ACTION

Election/Restrictions

1. Claims 47,51,52,54-57,59,63,63 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 8-29-05 to prosecute the invention of figure 91. These newly added claims refer to non-elected figure 92. Claims 54-56 and 63 are related to previously withdrawn claims 28-30.

Response to Arguments

2. Applicant's arguments filed 9-19-06 have been fully considered but they are not persuasive. Applicant contends the newly added limitation regarding bending of the stent wire to point the barb in a pre-determined direction distinguishes the claims over Chuter because Chuter teaches bending the barb. Examiner disagrees because the limitation regards a product by process step (see MPEP 2113) therefore an anticipatory reference must only show the final structure implied by those steps, and furthermore Chuter discloses the barbs may be welded to the stent wires (lines 64-65 of col. 8).

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the

Art Unit: 3738

applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 45,46,48-50,53,58,60-62 are rejected under 35 U.S.C. 102(e) as being anticipated by Chuter US PN 6,849,087.

Chuter discloses in figures 7a-7b, 14-16, and col 8 lines 39-54 an endoluminal prosthesis comprising a cannular body having stent comprising integral barbs adjacent a proximal end of the prosthesis wherein the stent wire has been bent to point the barb in a predetermined angle relative to the longitudinal axis. Note figure 7b is described to include a barb that may be welded to the stent wire.

Conclusion

5. All claims are drawn to the same invention claimed in the application prior to the entry of the submission under 37 CFR 1.114 and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the application prior to entry under 37 CFR 1.114. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action after the filing of a request for continued examination and the submission under 37 CFR 1.114. See MPEP § 706.07(b).

Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the

Art Unit: 3738

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
